

# MCR

## MOBILE COLLABORATIVE UNIT

### ONE UNIT FOR ALL YOUR APPLICATIONS

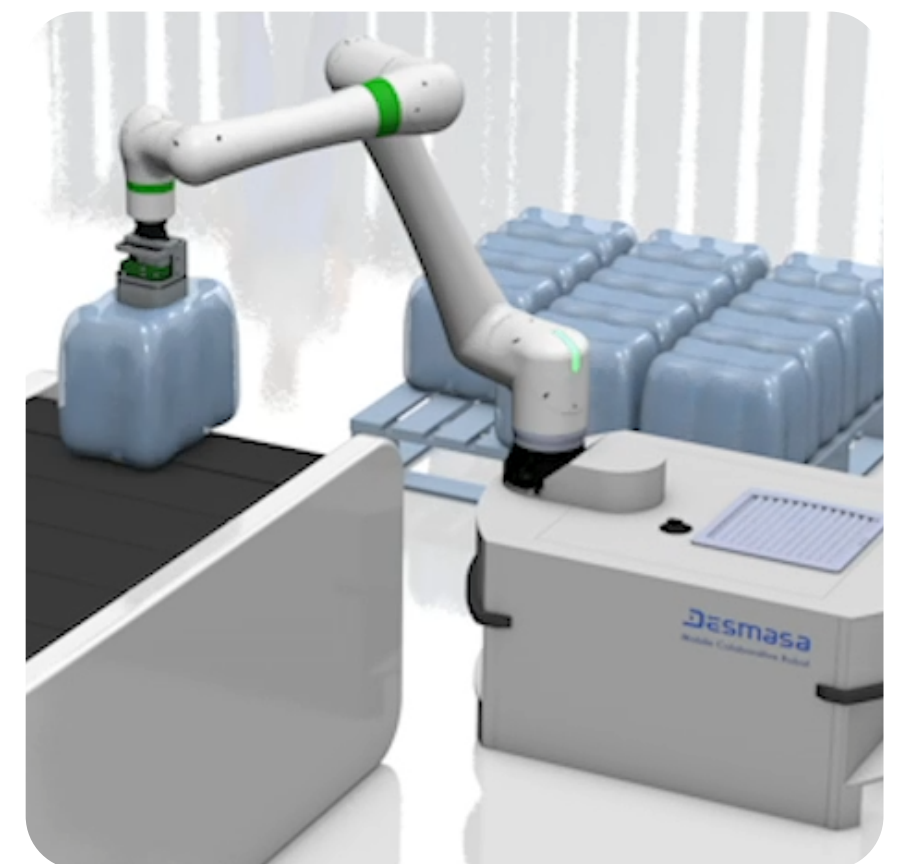

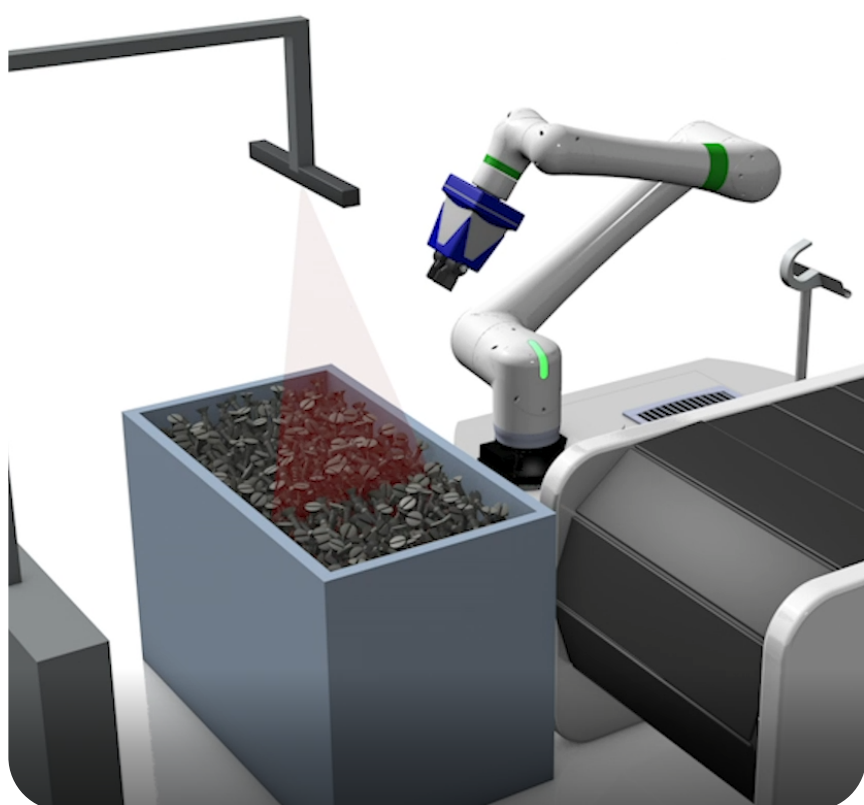

Its main characteristics are:

1. Ease of transport and mobility.
2. Simple anchoring using clamps.
3. Simple configuration with customizable interface
4. 100% collaborative work.
5. Compact equipment, work in confined spaces.
6. CE certification in all applications.

Different options / configurations that make the DESMASA unit created exclusively for each client.

- HIGH SPEED MODE (Safety Scanner)
- AGV
- ARTIFICIAL VISION CAMERA

Thanks to its mobility and versatility, it can work in different applications within our production plant in the same shift. We optimize the investment quickly thanks to its efficiency. Extremely reliable and safe. It has great features, so it can work with humans in a wide range of industrial applications, such as handling, machine maintenance, inspection and logistics. Two complementary models, the MCR and MCR +, the version with AGV that makes it autonomous.
