

## FIELD system Daily Check

### DESCRIPTION

FIELD system Daily Check is an application that allows an easy and reliable execution and recording of daily checks including instructions on mobile devices.

### KEY BENEFITS

- Production failures can be analysed by seeing the daily check log
- Increased production due to new digital logging and improvements
- Improved processes and checking due to daily logs being recorded

### KEY FEATURES

- Record and display the history of daily check of equipment
- Check items will be displayed by reading the QR code on equipment
- Records can be input by selecting, filling-in or photo-taking
- The check results can be confirmed from remote PC
