Installing conditions	
Power supply	AC200V $\pm 10\%$ 3-phase 50/60Hz ± 1 Hz, AC220V $\pm 10\%$ 3-phase 60Hz ± 1 Hz, Connection cable terminal size: 8-5, Power consumption: 13kVA
Air supply	Air pressure: 0.5 - 0.7 MPa, Flow rate: 160L / min or more *Regulator-side coupler mounting screw: Rc1/4
Shield room	If discharge noise can interfere with surrounding radio, television and other sets, a shield room needs to be created
Environment	Ambient temperature: 15-30°C, *Recommend 20 ± 1 °C for high precision machining. Install under the oil mist free and dust free environment. Humidity: 75% RH or less
Grounding	400 mm or more are recommended as concrete foundation ground where machine is located to endure its weight. Ground should be selected where no vibration or no impact effect. As vibration level, the maximum amplitude should be 2 nm or less under frequency band from 10 to 20 Hz. The unit must be grounded to prevent damage resulting from electro-magnetic interference or electrical leakage. The unit is recommended to be installed so that the ground resistance is less than 10 Ω . Also the grounding should be isolated from other machines.
