● standard - not available () with hardware and/or software option

*1) Smaller mold than this size may limit clamp force.

*2) If the weight of a mold exceeds maximum mold weight, the molding condition may be limited.

*3) Maximum injection pressure and maximum hold pressure are the output of the injection unit, not the resin pressure.

- Maximum injection pressure and maximum pack pressure are the maximum values that can be set.

*4) Maximum injection rate and maximum injection speed is a theoretical value.

- Maximum injection rate and maximum injection speed can not be guaranteed when the injection pressure is maximum.

*5) The maximum injection pressure setting at high pressure filling mode option.

- There is a limitation in injection time setting and pack time setting, when high pressure filling mode option is selected. (Contact sales for detail)

*6) Maximum injection pressure 1 and maximum hold pressure 1 are the values when the wear-resistant and anti-corrosion cylinder etc. is installed.

- Maximum injection pressure and maximum pack pressure may vary depends on the installed screw and cylinder specifications.

*7) Maximum injection pressure 2 and maximum hold pressure 2 are the values when the general purpose cylinder etc. is installed.

- Maximum injection pressure and maximum pack pressure may vary depends on the installed screw and cylinder specifications.

*8) Sprue break cannot be used with increased nozzle touch force option.

*9) The machine without option.

*10) The pressure conversion is 1MPa=10kgf/cm².

*11) The molding condition might be limited by the resin. (Contact sales for detail)

*12) In case of the replacement to different screw diameter after shipment, some covers may be needed to replace. (Contact sales for detail)
