Experience more
Collaborative robots for a wide range of applications

MORE choices
MORE payload
MORE reach
MORE control
Why settle for less when you can get MORE?

FANUC’s CR series of collaborative robots offers more choices, more payload, more reach and more speed than any other cobot series on the market. Safety-certified, FANUC cobots work hand in hand with humans to add value to your processes. Covering the needs of medium- and small-sized businesses as well as automation beginners and large corporations, the range contains exactly the right solution for your business.

More choices for more businesses
Do you run a small- or medium-sized company and have never thought about automation? If so, FANUC cobots provide you with just the opportunity you are looking for. Quick to install, easy to use and offering unrivalled reliability, they represent a lasting solution that boosts your productivity and provides you with new growth opportunities. They also offer a safe return on investment. Let our experts advise you on exactly the right automation solution for your needs!

Easy to work with
Either break from traditional programming with the FANUC Hand Guidance function or do your programming with FANUC’s new iHMI guides. FANUC Hand Guidance allows you to teach your collaborative robot by leading it through paths as well as to lift heavy objects manually. FANUC’s new iHMI, on the other hand, provides you with a step-by-step guide to setting up CR series cobots and creating programs, not to mention other wizards and tutorials to help new users.

FANUC cobots stop at a touch and restart at the push of a button. Convenient hand guidance functionality also makes adapting to different applications very straightforward.
MORE performance and MORE capability

Offering payloads of 4 kg, 7 kg, 14 kg, 15 kg and 35 kg and unrivalled reach, the CR series is ideally suited to handling processes that expose human workers to the risk of repetitive strain and other work-related injuries. Since FANUC cobots control force with much more precision than humans, they also offer you huge benefits in terms of quality and repeatability.

More payloads – up to 35 kg
With just the right payload for your application in its range, only FANUC offers 6 models with payloads from 4 kg up to a world-beating 35 kg. Plus, the FANUC CR-35iA is still the strongest cobot on the market.

More reach – up to 1831 mm
FANUC’s cobots are available with reaches of 550, 717, 911, 1441 and 1813 mm – all with a 360° work envelope.

More speed – up to 1500 mm/sec
To ensure safety, cobots limit force and momentum by operating at lower speeds than other types of robots. However, thanks to safety monitoring, FANUC CR models reach speeds of up to 1500 mm per second.
Dual Check Safety (DCS)

DCS is a safety system that monitors position and speed. It is a proven technology used on many standard FANUC robots. On the CR series, third-party safety equipment can be connected to DCS to provide an additional level of safety and increase productivity.

MORE freedom and flexibility

The FANUC CR series can work side by side with humans or collaborate with them without the need for external safety devices. As a result, you enjoy better versatility and work ergonomics, benefit from flexible mounting options and save valuable production space.

ISO-certified safe to work with people

The ISO 10218 and ISO 13849 Cat. 3 Pld. certified CR series is equipped with ultra-safe FANUC contact stop protection based on proven sensor technology. All robots restart easily and quickly after a contact stop. In addition to contact stop, the CR series comes with push back and anti-trap functions for additional protection. To prevent the risk of pinching, the larger CR-35iA model comes wrapped in a passive soft cover. What is more, customisable speed and safety settings help you adapt each collaborative robot exactly to your specific application.

Flexible mounting options

For more flexible layouts, all models except the CR-35iA can be upside-down mounted, wall mounted or fixed to a mobile platform or a rail.
Break away from traditional programming! The FANUC Hand Guidance function is available for all FANUC collaborative robots. Depending on the model, it allows you to teach your collaborative robot by leading it through paths or to use it to lift heavy objects weighing up to 35 kg.

**Easy teaching without programming**
Teach your FANUC collaborative robot easily by leading it through paths and points. Hand guidance is easy and intuitive and eliminates the need for a pendant to teach positions. It also keeps your training costs low and saves you valuable time.

**Hand guidance for easy manual handling**
Using hand guidance, FANUC cobots can be used to pick up and carry heavy objects. Taking the strain off human operators on one-off operations, this is easily done by guiding the robot arm and tooling by hand to the right point, picking up and carrying the workpiece using hand guidance.

---

**Hand Guidance model for all CR series models**
- plug and play functionality with easy-to-attach joystick
- compact lightweight design
- wireless communication via iPendant

**Hand Guidance model for CR-35iA**
- collaborative handling during robot operation
- ISO-10218-compliant with enabling switch and emergency button
- equipped with FS-15iA sensor
- user-friendly handle mounted on robot wrist
- handle ensures easy control of robot and reduces training time

**Easy programming with iHMI**
FANUC’s iHMI user interface offers ample processing power and clear high-resolution screen displays. To make operating your cobots as easy as possible, it can display setup, programming guides and tutorials on the main home page. By using the programming guide, even first-time robot users can create a program for simple handling tasks and execute it in just 30 minutes. Easier usage also facilitates system setup and maintenance to improve efficiency.
MORE reliability

All FANUC’s CR series robots use proven FANUC technology and a familiar interface. As a result, the CR series operates like any other FANUC robot with exactly the same high degree of reliability, uptime, dexterity and world class +/- 0.01-0.03 mm repeatability.

More features

With more than 250 software features, FANUC’s latest R-30iB Plus controller guarantees the best processing speed and robot performance for every FANUC cobot. Designed for increased user-friendliness and minimal energy consumption, the R-30iB Plus comes in five different cabinets to help you make the most of your floor space and production cell layouts.

Proven technology

For more reliability, all FANUC cobots are based on proven LR Mate and M-20 technology. They offer good repeatability and come with the standard FANUC interface for easy learning, programming and setup. As a result, no extensive retraining is necessary. Application scenarios can be modelled easily using ROBOGUIDE simulation software. FANUC cobots are customisable and include a large number of options. They are also backed by full spare parts availability, global service and support.

ROBOGUIDE simulation software

FANUC R-30iB Plus controller
Discover the wide range of collaborative opportunities

**ASSEMBLING**
Preventing the risk of repetitive strain injuries amongst assembly line workers, the CR series will lift and position heavy components on machining and assembly lines. The repeatability offered by using a collaborative robot for these processes also improves quality and reduces cycle times. Benefits: Higher output, more speed and improved quality

**MACHINE TENDING**
The CR series is ideally suited to those machine tending applications that frequently require an operator’s presence. Benefits: Maximized efficiency, better quality, more throughput and improved performance

**MOBILE PLATFORM**
Automated guided vehicles (AGVs) work effectively with CR series robots and humans and provide an effective means of enhancing applications such as workpiece transfer on your CR production line. Benefits: Enhanced flexibility thanks to the mobility of the cobot

**HAND GUIDANCE**
Available on the CR series robot, FANUC Hand Guidance allows you to forgo traditional programming and teach your collaborative robot by leading it along motion paths. It also enables you to use your robot to lift heavy objects weighing up to 35 kg. Benefits: Reduced training costs and saving of valuable time

**PART INSPECTION & TESTING**
During part inspection, robots take over dull tasks where high-precision is required. Equipped with smart vision accessories, the CR series is ideally suited to perform quality control (e.g., microwave ovens) and, thanks to flexible mounting options, a CR cell can be designed to meet your requirements exactly. Benefits: Better repeatability and consistently high levels of product quality

**SEALING & DISPENSING**
Whether they are used to apply sealants, adhesives, paints or other fluids, CR series robots work safely next to humans across a range of industries. Benefits: Reduce waste and increase accuracy

**PICTING, PACKAGING, PALLETISING**
On packaging and palletising lines, the CR series can be used to carry out dull, repetitive, dirty and dangerous handling tasks, freeing up staff to perform more complex and diversified jobs requiring human skills. Benefit over yellow robot: The CR provides operator safety, and a human can remove the first full pallet while the robot continues to fill the second

**PICKING WITH DUAL CHECK SAFETY (DCS)**
FANUC Dual Check Safety (DCS) is a smart, integrated software solution that monitors position and speed. It keeps operators, robots and tooling completely safe. With no need to invest in expensive space-taking safety equipment, it also helps keep the space required for robot cells to a minimum. Benefits: Space-saving and cost-effective

**PICK & PLACE**
For high-speed precision applications such as pick and place, it makes a lot of sense to integrate other FANUC robots such as the SCARA and LR Mate into your collaborative workforce. Benefit: Integrated vision and linetracking from one supplier

If you want to combine the strength, precision and repeatability of a robot with human know-how and manual dexterity, collaborative robots make the best choice – by working hand in hand, humans and robots can add real value to your processes. No need for safety fences – FANUC collaborative robots allow easy integration into human workspaces for even more efficiency and improved health and safety.

**PART INSPECTION & TESTING**
During part inspection, robots take over dull tasks where high-precision is required. Equipped with smart vision accessories, the CR series is ideally suited to perform quality control (e.g., microwave ovens) and, thanks to flexible mounting options, a CR cell can be designed to meet your requirements exactly. Benefits: Better repeatability and consistently high levels of product quality
MORE possibilities

As with all FANUC robots, FANUC’s collaborative robot series can be equipped with any of FANUC’s intelligence functions - made by FANUC, developed specifically for FANUC robots, to give you more possibility for automating with cobots. Intelligence-ready functions include FANUC iRVision, 3D vision with FANUC 3D Vision Sensor, FANUC Force Sensors and much more.

3D bin picking
Opening up a wealth of possibilities, the 3D Vision Sensor even enables robots to detect randomly piled parts including shiny, multi-coloured or semi-transparent items. Attached to the robot arm or a gantry, the FANUC 3D Vision Sensor is easy to set-up using the iPendant handheld controller or PC.

Recognition, reading and sorting
Using the Vision Sensor, the CR series is capable of locating workpieces, reading bar codes and sorting by colour.

A sense of touch
FANUC Force Sensor detects force and torque applied to the end effector, allowing the robot to carry out collaborative assembly, fitting and weighing operations for example.

  - CR-15iA: 900
  - CR-35iA: 900
- Max. speed (mm / s) <sup>4)</sup>:
  - CR-4iA: 1000<sup>5)</sup>
  - CR-7iA: 1000<sup>5)</sup>
  - CR-7iA/L: 1000<sup>5)</sup>
  - CR-14iA/L: 500<sup>5)</sup>
  - CR-15iA: 800 / 1500<sup>4)</sup>
  - CR-35iA: 750<sup>5)</sup>

### Allowable load moment at wrist

- J4 axis (Nm):
  - CR-4iA: 8.86
  - CR-7iA: 16.6
  - CR-7iA/L: 16.6
  - CR-14iA/L: 31.0
  - CR-15iA: 26.0
  - CR-35iA: 110
- J5 axis (Nm):
  - CR-4iA: 8.86
  - CR-7iA: 16.6
  - CR-7iA/L: 16.6
  - CR-14iA/L: 31.0
  - CR-15iA: 26.0
  - CR-35iA: 110
- J6 axis (Nm):
  - CR-4iA: 4.9
  - CR-7iA: 9.6
  - CR-7iA/L: 9.6
  - CR-14iA/L: 13.4
  - CR-15iA: 11.0
  - CR-35iA: 60

### Allowable load inertia at wrist

- J4 axis (kgm<sup>2</sup>):
  - CR-4iA: 0.2
  - CR-7iA: 0.47
  - CR-7iA/L: 0.47
  - CR-14iA/L: 0.66
  - CR-15iA: 0.90
  - CR-35iA: 4
- J5 axis (kgm<sup>2</sup>):
  - CR-4iA: 0.2
  - CR-7iA: 0.47
  - CR-7iA/L: 0.47
  - CR-14iA/L: 0.66
  - CR-15iA: 0.90
  - CR-35iA: 4
- J6 axis (kgm<sup>2</sup>):
  - CR-4iA: 0.067
  - CR-7iA: 0.15
  - CR-7iA/L: 0.15
  - CR-14iA/L: 0.30
  - CR-15iA: 0.30
  - CR-35iA: 1.5

### Installation environment

- Acoustic noise level (dB):
  - CR-4iA: 64.7
  - CR-7iA: 64.7
  - CR-7iA/L: 64.7
  - CR-14iA/L: ≤ 70
  - CR-15iA: ≤ 70
  - CR-35iA: ≤ 70
- Ambient operating temperature (°C): 0–45

### Protection

- Body standard/optional: IP67
- Wrist & J3 arm standard/optional: IP67

---

*1) 911 mm (load capacity ≤ 12 kg) - 820 mm (load capacity ≥ 12 kg)
*2) ISO 9283
*3) In case of the wall mount, the operation space will be restricted according to the payload.
*4) In case of short distance motion, the speed may not reach the maximum value stated.
*5) It is necessary to set a motion speed according to risk assessment of system considering pinching with the surroundings.
*6) If the area is monitored by a safety sensor (located separately).
MORE confidence

With FANUC, you benefit from efficient FANUC service worldwide. Wherever you need us, our comprehensive FANUC network provides sales, support and customer service all around the world. That way, you can be sure you have always got a local contact that speaks your language.

- **Lifetime OEM spare parts**
  As long as your machine is in service, we will provide you with original spare parts – for a minimum of 25 years.

- **Efficient training**
  The FANUC Academy offers everything you need to upskill your teams and increase productivity – from introductory programs for beginners to courses tailored to the needs of expert users and specific applications.
