

NEW FANUC CONTROLLER J-30iB

The multi-axis automation solution

FANUC

different configuration variants available

FANUC proven technology

Look and feel of known FANUC ROBOT programming environment

NEW J-30iB

Controller and servo drives without kinematics

Flexibility whatever the application:

- 3 basic variants in pipeline configuration available
- Special variants available after technical evaluation
- A and B-cabinet available
- Easy to plan, operate and maintain
- Feel and look of known FANUC Robot programming environment
- Known and well proven robot Software-options are largely supported
- Highest availability
- Up to 4 axes per motion group supported
- Max. number of motion groups is similar to „normal“ robot

Available pipeline configurations

- A-config (160/160/160/80/80/80)
- B-config (80/80/80/40/40/40)
- C-config (40/40/20/20/20/20)
- Special config on demand

Controller

- Open air cabinet
- Mate cabinet
- A-cabinet
- B-cabinet
- iPendant Touch

Electrical connections

- Voltage 50/60Hz 3phase [V] 380-575
- Voltage 50/60Hz 1phase [V] -
- Average power consumption [kW] 1-3

Installation conditions

- Ambient temperature [° C] 0-45
- Controller protection IP54
